Control Power	NEMA 2 480v
Dust Collector	WAM 400 Pulse Jet w/Fan
Air	3 HP Air Compressor
*DOES NOT INCLUDE TRANSFER BLOWER	

\*\*Based on Cement at 88lbs c.f.

### Silo Description

*SupersaX* Trans Pod system is a portable self-contained hopper designed to transfer dry bulk products to be used on job sites or in plant applications. The design has many features that make the *SupersaX* Trans Pod hopper system a must have in applications when transferring from supersacks to bulk storage. The hopper can store up to 10,000 Lbs. of bulk product to be pneumatically transferred out using our 12" vane feeder with transition tube. The hopper is equipped with a fan drawn dust collector for dust free operation. Fork pockets allow for ease of transport. Filling the silo is done by using a forklift to lift the product over hopper and lowered onto the knife plate inside. The hopper has a ladder to allow operator safe access to the top of the silo to assist with bag unloading.
